INDEPENDENCE DAY

2014

ADVISORY TO AMERICA

America should know that there is a group of uniquely knowledgeable individuals who dedicated their professional lives and careers as federal officers in the field of immigration. Our organization is "NAFBPO," the National Association of Former Border Patrol Officers. We know and have experienced more than anyone else the various root causes of the illegal immigration challenge. Our sole purpose is to educate America about what is good for America and what is bad for America with regards to Immigration. With this purpose we write to you today from our intelligence perspective of connecting the dots about the current invasion of America.

This advisory is specifically for the American People and is a thumbnail sketch of how America arrived at where we are today from the immigration perspective and present our recommendation of what must be done to preserve our Republic and the American way of life now and in the future.

America's ongoing Illegal Immigration crisis has once again become a front page item across our nation. The issue has raised many passionate voices: some advocate an open border policy, while others believe that a fence is the answer. These voices are now increasingly amplified by this administrations orchestrated efforts to encourage more aliens to come to America illegally. The current Central American emigration of minors appears to be nothing more than another planned step in fundamentally changing America and has brought about unprecedented lawlessness throughout the United States which negatively impacts Americans in all fifty states. What many fail to realize is that the open borders crowd is at war with America while the other side thinks this is a debate. This is war being waged on America, this is not a debate.

At the root of our Illegal Immigration crises' historically and currently is the interaction of money and power in the political arena. Those for open borders reward the elected political leaders for championing their goals politically. The secure borders, secure America advocates principally understand that immigration is a National Security, (jobs and the economy), and Public Safety, (the right of all Americans to be secure in their persons and property), issue which includes public health and strict enforcement of existing Immigration Law. This group encourages and supports those elected officials that promote their goals politically. To further delineate the disparity, open borders advocates seek to benefit financially and politically with no regard for the consequences of their efforts and border security advocates want to preserve the American way of life and promote a safer more secure America for their children and grandchildren.

From our view the present government is managing and encouraging Illegal Immigration as an official policy of the United States to expand the size and scope of government and to plant a festering seed of division within our citizenry to provoke ordinary law abiding citizens into a situation where the administration can justify the use of force similar to that applied at Ruby Ridge and Waco. This result will not be the product of unintended consequences. The longer the issue is drawn out, the more money and power flows to elected officials, the more is at stake and the more it will cost the American taxpayer in blood and treasure. When the exchange exceeds the consideration in money for power the result will likely be paid in blood through the manipulation of political power. It is up to the American People and the U.S. House of Representatives to ensure that this juggernaut is defunded now and corrected at the ballot box before this administration fulfills their goal and catapults America into a tragic conflict. The Republic hangs in the balance.

***Our paramount mission is to contribute to the security and stability of the United States.
To that end, we shall propose and be advocates for immigration laws and policies that we believe serve
those national interests, and we will oppose those that do not.***

During the last Central American Refugee Program in the 1980's I personally observed non governmental organizations recruiting illegal aliens to come to America and fraudulently claim Political Asylum when in fact it was a false claim. We are again seeing the claim coaching in this latest group of illegal aliens. Politically speaking, why should the elected officials solve the issue if they are reaping large long term rewards for their inaction? S-744 on it's face appears to be so egregious and threatening to the American way of life one has to wonder if the true purpose of that bill is to continue the status quo that exists in America today with regard to unbridled Illegal Immigration. Undoubtedly, the 68 Senators that voted for S-744 did not act in the best interests of America.

Our current predicament flows directly from the Immigration Reform and Control Act of 1986, which the United States Attorney General at the time now describes as a big mistake. The false argument that we would bring illegal aliens out of the shadows aided the political deception that lead to the passage of that law. Initially, we were then talking about eight hundred thousand illegal aliens that would apply and benefit. Over three million applied and approximately 2.7 million were legalized initially. Through those 2.7 million many million more were legalized. The real flaws in this approach was that it set precedents for those breaking our immigration laws to be rewarded and that application fraud would be overlooked which encouraged applicants to lie, cheat and steal to obtain a benefit.

One of these legalization offices had an estimated seventy five percent fraud rate of applications. These were rewarded by Main Justice with waivers and granted amnesty even though their applications were fraudulent on their face. This encouraged lawlessness whereby the United States Government encouraged illegal aliens to come here illegally and lie in their applications. The 2.7 million successful applicants knew this, the estimated 14 million that benefited from and gained immigration status from the approved applicants knew this and transmitted the information to their friends and relatives in their home countries. When the United States Government eased and then practically suspended the employer sanctions provisions of the 1986 Act that paved the way for more illegal immigration.

What the Illegal Alien knows, and must be reversed, is that the laws as written by the United States Government mean nothing if those laws are not enforced. When the actions of the United States Government encourage violation of American Immigration Laws it is those actions the potential Illegal Alien correctly understands as fact that leads to accelerated illegal migration to the United States. Immigration Laws not enforced invite and encourage violation of those laws.

As of April 2014, approximately 60,000 illegal aliens principally from Central America had been processed through centers located mostly in California operated in conjunction with the Navy, HHS and DHS. The bulk of these illegal aliens were working age males age 15-18 and almost all claimed they came to the United States illegally in order to be here when President Obama declared Amnesty in 2014 and in the interim to earn money to bring their relatives up into the United States once they gained a legal status. The administration knows this information. The administration also knows that virtually none claimed they were fleeing any sort of violence, poverty or persecution. We also know that the medical screening was hit or miss and not adequate to fully protect the American Citizen population.

The following is how this worked in 1986 and how it is reportedly happening today. By April 2014 this 60,000 would have individually communicated back to their home countries that illegal aliens under the age of eighteen would be released in America and given "permisos". This is obviously the main impetus of the unprecedented mass migration of minors experienced May through July 2014 at McAllen, Texas, whose members are being spread throughout the United States by HHS and DHS and whose presence in the United States is a direct threat to National Security and Public Safety.

This invasion significantly reduces on duty Border Patrol Agent effectiveness by taking them off of the border and places them in processing or custodial assignments. This interruption of security measures benefits no group more than the transnational criminals and terrorists that seek to enter the United States illegally.

<http://www.dcclothesline.com/2014/07/05/border-agent-ignores-gag-order-obama-aiding-abetting-fascilitating-illegal-alien-smuggling/>

A textbook example of the results of these policies on American Jobs, even though selectively reported at the time, happened in 2008 at Postville, Iowa. Iowa is not on the Mexican border. <http://en.wikipedia.org/wiki/>

*Our paramount mission is to contribute to the security and stability of the United States.
To that end, we shall propose and be advocates for immigration laws and policies that we believe serve
those national interests, and we will oppose those that do not.*

What is not widely known about the Postville Raid is that the initial enforcement action was planned to be executed in the year 2000, but was not carried out for political considerations. When the raid was carried out in May of 2008, it was carried out for political reasons connected to the work site being organized by labor unions which would potentially highlight the scope and extent of the illegal activity at the plant and disclose the exploitative nature of the poor working conditions and low pay at that food processing plant. Remember, the Postville Raid came immediately after the 2006-2007 push for Amnesty failed. In this time frame another Political Deception was and still is being offered that illegal aliens come here to do jobs Americans are not willing to do. In the aftermath of the Postville Raid hundreds of American Citizens lined up to apply for hundreds of jobs vacated by illegal aliens. This response to those immediate job vacancies has been under reported to the extent the response was virtually concealed. This leads us to identify another deception narrative of the open borders advocates and that is under reporting or not reporting the negative impacts of Illegal Immigration.

How many other work place situations like Postville exist today in America? Are enough of them members of the U.S. Chamber of Commerce to have The Chamber advocate all out for Amnesty? If the Immigration Laws that existed at the time had been fully enforced the Postville, Iowa, incident would not have occurred at the cost of nearly six million dollars of taxpayer funds.

In approximately January 2009 the Obama administration expressed the desire to have federally owned land located along the U.S. Mexico border designated for enhanced environmental protection. The nexus between his very recent reelection and this political push did not go unnoticed. In New Mexico's Dona Ana County the point of contention was the Potrillo Mountains (Desert Peaks) that lie between the New Mexico town of Las Cruces and the Mexican town of Ciudad Juarez, Chihuahua, Mexico. Also directly affected is El Paso, Texas, even though the federal land is located in New Mexico. At the time Ciudad Juarez was considered the most dangerous city in the world and the murder capitol of the world. Senator Bingamin launched a concerted effort with environmental groups to produce enhanced protections for these pieces of public land.

The people of New Mexico and NAFBPO opposed the move as a whole. Bingamin's legislation did not make it out of committee in the U.S. Senate. Bingamin's successor and the senior senator from New Mexico again introduced legislation in the U.S. Senate which also failed. The Congressman from Dona Ana County then proposed enhanced protection for parts of the Organ Mountains parcel of these public lands which the people of Dona Ana County and NAFBPO support.

These two Senators then launched a disinformation/misinformation campaign advocating for an Organ Mountains Desert Peaks National Monument in Dona Ana County which included lands immediately adjacent to the New Mexico border with Mexico saying that the Border Patrol concurred when in fact the Border Patrol, the people of Dona Ana County and NAFBPO did not support it because of the Desert Peaks portion and the primary beneficiaries would be the transnational criminals that operate along the U.S./Mexico border and hamper law enforcement activities in that immediate border area.

I repeat, these two Senators represented that the Border Patrol approved of the Desert Peaks Monument which was not true. When American Sheriff's and the Dona Ana County New Mexico Sheriff went to Washington, D.C., to testify about the Desert Peaks proposal in Senate Committee they were not only prohibited from testifying they were not allowed to be present in the room to hear the other testimony. Obviously, a major political deception was being concealed in that room that the Senators did not want the Sheriff's to be privy to.

When these two United States Senators ignored the advice of the U.S. Border Patrol, NAFBPO, the Dona Ana County Sheriff, the New Mexico Sheriff's and the people of Dona County and presented the proposal to President Obama for Monument Status it was a purely political move against the best interests of their constituents and the people of the United States. This you-tube video is a synopsis of NAFBPO's Congressional Briefing given at Las Cruces, New Mexico, on the issue. <http://www.youtube.com/watch?v=yd8S6hmddzE>

In this time frame 2009 to 2014, America has gone from a reported 120 cities with significant Drug Cartel presence to an estimate exceeding 2,000 U.S. Cities with significant Drug Cartel presence today, and 50 or more of those cities having more than one cartel group present which clearly indicates that in that same time frame, 2009-14, that Drug Cartels have infiltrated the United States to a significant extent. An example of this is the fact that Phoenix was designated as the kidnapping capitol of the United States and second in the world to Mexico City while Tempe, Arizona, was arguably designated the Cartel Capitol of the United States when in one day 204 Sinaloa Cartel members were arrested in that city.

I personally observed in Dallas Fort Worth in June of 2013 a front page article declaring Dallas Fort Worth as Drug Cartel Command and Control Center by the Director of the Texas Department of Public Safety. <http://www.star-telegram.com/2013/06/08/4921705/dfw-is-now-a-command-and-control.html?rh=1>

On that same day the main television news showed a heated debate by the local city council decrying the social blight of plastic bags blowing across vacant lots and completely ignored the designation and admonition of the DPS Director. It is this type of deflection away from the negative effects of illegal immigration that America is being subjected to through media manipulation of the news on a daily basis.

Expanding on the Political Deception and deflection let's take a look at New York, Connecticut and Pennsylvania. When I see and hear the Mayor of New York City standing before the cameras and microphones while decrying the threat of the trans fats in french fries and the obscene amount of sugar in 32 ounce sodas I can't help but take notice that at that same point in time Heroin was selling in New York City at the historical low price of one dollar per milligram and that adolescents and teens alike in that city are combining Heroin with ordinary cough medicine to create a substance called cheese because it resembles the powdered cheese we sprinkle on pizza and spaghetti which is ingested rather than injected.

The low price indicates that the supply of Heroin exceeds the demand. These American children are then overdosing on these Heroin by products. When I read that in Hartford, Connecticut and Philadelphia, Pennsylvania, that five year old children are bringing Heroin to school for show and tell I know something is very, very wrong. Why isn't the Mayor of New York City or First Lady speaking out against the common presence of Heroin in their city and America and alerting the populace of the evils of Heroin and putting their energy in combating the Heroin threat in America? Distracting America by talking exclusively of food is deflecting attention away from the criminal enterprise of Heroin smuggling and redirects America's attention away from the real threat.

This amounts to political protection for the organized crime industry of smuggling and distribution of Heroin in the United States. The equation is simple, cocaine and heroin are grown and produced outside of the United States then smuggled across our borders before being placed in the hands of trusted foreign representatives inside the United States for distribution to every hamlet, town and city in America through a network that could teach Wall-Mart a thing or two about distribution. America is the largest illegal drug and alien market in the world and transnational criminals have virtually unlimited resources to protect and enlarge their organizations. Illegal Immigration is a large part of how they accomplish their business model inside the United States which is likely why the War On Drugs failed in that they can replace gaps in the supply chain almost instantly through illegal or legal immigration. The preponderance of the violence in our cities is directly related to the supply of illegal drugs from foreign countries.

The root problem is that this organized crime model of illegal immigration is ignored and allowed to flourish. DEA emphasis was on point of entry into the U.S. and point of sale not on identifying, disrupting and removing the points in the supply chain between the border and market. Then, the primary problem of laundering literally tons of cash and getting a percentage of the drug and alien sale profits back to the owners of the contraband is a huge cash generator for interests inside the United States. The aggregation of this situation reeks of organized crime operating at nearly every level of American society wherein they all live among us with the protection of our various governments through the sanctuary city model and other policies which violate existing law or otherwise conceal these practices. Money launderers inside America have a financial interest in maintaining open borders. Illegal Immigration ensures the supply chain.

*Our paramount mission is to contribute to the security and stability of the United States.
To that end, we shall propose and be advocates for immigration laws and policies that we believe serve
those national interests, and we will oppose those that do not.*

Here is more evidence about how political protection for organized crime works inside the United States compliments of the United States Department of Justice. For instance let's take a look at Sheriff Joe Arpaio of Maricopa County Arizona, and the Arizona experience. (Remember, this is the time frame that Phoenix Arizona was the kidnap capitol of America and Tempe Arizona was the cartel capitol of America and the inmate population in Arizona prisons was approximately one third illegal aliens. Sheriff Arpaio does not like criminal activity, particularly in Maricopa County.)

Several years prior to 2009 Sheriff Arpaio accepted the invitation from the Department of Homeland Security to participate in programs and concepts known as granting 287 (g) authority to his detention personnel and his department partnering in a program called secure communities. The purpose of these two programs were to identify and remove aliens from Maricopa County that were engaged in criminal activity. During the first full year that these two enforcement strategies were implemented in Maricopa County over 72,000 criminal aliens were removed from Maricopa County. Violent crime decreased 60% and overall crime decreased by 14.7 percent at a time when the national average was about one third of that percentage.

Those are very impressive numbers pointing out conclusively that illegal immigration and crime are directly related, especially violent crime. Faced with these positive results why wouldn't every Mayor and Sheriff throughout America want to replicate the programs that afforded the people of Maricopa County such additional security. The results of these programs that filtered Illegal Alien Criminals out of society was viewed by Sheriff Arpaio as a good start, not an end result. Obviously, the Obama Administration was opposed to having Sheriff Arpaio's successes implemented throughout America because shortly after the dawn of 2009 the U.S. Government began suing Sheriff Arpaio.

This was obviously done to discourage other jurisdictions from adopting anti crime measures that Sheriff Arpaio had proved dramatically lowered the crime rate by removing Illegal Alien criminals from his county. Subsequently DHS removed access to Secure Communities and revoked 287 (g) authority for Maricopa County. In response, Arizona Senate President Russell Pearce wrote and introduced SB-1070 which passed both houses of the Arizona Legislature and was signed into law by Arizona Governor Jan Brewer.

SB-1070 mirrored the federal law that the Obama Administration was now denying the people of Maricopa County and Arizona. Senator Pearce did this because he fully realized that it was these federal laws that were a demonstrated effective tool in combating crime in Arizona. The Obama Administration and main stream press attacked SB-1070 and Arizona, by misrepresenting what the law said and was intended to do. Beware the main stream media working in concert with this administration to deceive you.

The Mesa Arizona School District lost approximately 50,000 students in the aftermath of the passage of SB-1070 which indicates that the illegal alien population was significantly higher in Phoenix than estimated. The total exodus of illegal aliens from Arizona after the passage of SB-1070 is not known but the pre SB-1070 estimates of 400,000 were probably lower than the actual number. At least one Arizona Congressman was advocating that the rest of the United States boycott Arizona in their move to combat the effects of illegal immigration in Arizona. This congressman is identified in Trevor Loudon's book, *The Enemies Within*, page 177 and outlines his Communist affiliations and his co chairmanship of the Congressional Progressive Caucus.

Mesa, Arizona, had the appearance of a Sanctuary City in 2009. In 2010 it was discovered that two members of a murderous illegal alien rip off crew operating in the Peck Canyon Area within the Proposed Tumacacori Highlands Wilderness Area of Santa Cruz County near Rio Rico, Arizona, resided in Mesa, Arizona. Two brothers named Arellanes were members of this rip off crew. One of these brothers was wounded by gunfire and was arrested at the scene of Border Patrol Agent Brian Terry's murder which brought to light the Department of Justice scheme to deliver guns to Mexican Drug Cartels known as Operation Fast & Furious. The same Congressman advocating that the world boycott Arizona for passing SB-1070 was the principal proponent for the creation of enhanced protection status for the Peck Canyon Area which was clearly a benefit to drug and alien smuggling in that area. There is compelling reason to suspect that the push for enhanced protection for federal lands near the border for environmental reasons benefit the transnational criminals more than anyone else and certainly laid the ground work for the Peck Canyon area becoming the lawless area it was when Brian Terry was murdered.

In this time frame between 17% & 60% of the illegal aliens apprehended in the Tucson Border Patrol Sector had criminal records inside the United States. Considering these numbers, the numbers that Sheriff Arpaio was generating and trends throughout the United States indicate that the criminal illegal alien population inside the United States prior to 2014 probably exceed five million people. If 287 (g) and Secure Communities were successful in Maricopa County these programs would work throughout the nation.

Likewise the estimate of eleven million illegal aliens present in the United States as of today is highly unlikely because for three consecutive years prior to 2014 Border Patrol Agents in the Tucson Sector estimated they were apprehending less than three percent of the illegal aliens that they knew were entering the United States illegally and were only effectively patrolling seventy percent of their assigned border area. Given the influx of Illegal Aliens since 2009 the Illegal Alien population currently could easily exceed 30 million. The truth is, nobody knows how many are here.

Today, Border Patrol Agents tell us that they have apprehended approximately 52,000 Central American illegal alien minors this year and that number represents only a fraction of those that actually entered the United States and were not apprehended. Of these apprehended a significant number are obviously gang members and criminal types who are being released into American society. America must stop importing criminals and criminal gang members.

Many appear to have significant communicable diseases and that HHS and DHS are actively concealing critical information from the public and controlling what is reported about the apprehended population of illegal aliens is clearly evident. What are they hiding? At the very least they are hiding the truth.

<http://www.vdare.com/posts/obama-delivering-quarter-million-illegal-aliens-to-u-s-homes-where-is-the-gop>

The situation as it exists today was created by elected officials throughout the United States, especially those in national office by their refusal to live up to their oath of office and demand that existing Immigration Law be vigorously enforced since the passage of the 1986 Act. That prominent members of this group are now being tasked with finding a real and workable solution to the ongoing and expanding crisis that could have not occurred without their misfeasance is very disturbing to the American people. This mistrust of government is prevalent throughout America.

In crafting a meaningful solution some basic factors must be acknowledged, accepted and incorporated into actionable results in a very short time frame, such as two to three weeks at the most. The customary committee hearings, consultations, bifurcations, lollygagging and invention of political excuses will have to go out the window. The survival of the Republic is at stake and unusual attention, cooperation and decisive leadership are immediately required to overcome the results of the enemies of America within this current administration who appear to be intentionally sowing the seeds of rebellion and rebellion may be the underlying purpose of this administration given their record of deceit and deception and a demonstrated hate for America, it's military and Constitution.

Mexico is in North America. Central America begins at Mexico's Southern Border with Guatemala. Guatemala, Honduras and El Salvador are in Central America and the main home countries of this current surge. Honduras is reportedly in the political sphere with Cuba and Venezuela which raises real concerns about anyone claiming to be from Honduras. To understand the correct solution to this crisis a recitation of why it happened must be included. Briefly, in addition to the failure to implement the provisions of the 86 Act, recent events have triggered a mass invasion.

In the last two years approximately 290,000 illegal alien emigrants from this area of Central America were apprehended. How many actually came that were not apprehended we do not know. They came primarily knowing it was against American Immigration Law yet condoned by the United States Government and further by the United States Senate in the passage of S-744 wherein that magic word Amnesty was implied and became imbedded in their psyche next to the 1986 Amnesty. They knew that when President Obama ordered the release of 68,000, more or less, criminal aliens in deportation proceedings inside the United States onto the streets that America was not enforcing the criminal sections of U.S. Immigration Law. They already knew the administrative provisions were not being enforced.

*Our paramount mission is to contribute to the security and stability of the United States.
To that end, we shall propose and be advocates for immigration laws and policies that we believe serve
those national interests, and we will oppose those that do not.*

When President Obama instituted DACA and included conversations about the Dream Act they knew that was a signal that illegal aliens up to age 31 were going to be ignored by the government and thereby encouraged hordes of potential migrants to come to the United States in violation of law at the invitation of President Obama. When President Obama announced on world wide television and radio that it does not make good sense to enforce America's Immigration Laws the message was clear. That message is that America will not enforce her Immigration Laws. We are now a lawless nation on the path to becoming a failed state and this administration gives every indication that everything is going according to plan.

This is the perception that was intentionally transmitted and is currently reinforced when every member of this group of illegal aliens is released from custody into America not only to Central America but to the world by President Obama and this administration. It is this reinforced perception that must be reversed. The only way this is possible is through visual reinforcement and swift action taken against all illegal aliens entering or present inside the United States. This current invasion belongs exclusively to this administration.

To understand what must be done we need to accept how the target audience in Central America perceives things. Their world is structured and a hierarchy exists which causes them to think and perceive things the way they do. I can speak to this from having processed and interviewed hundreds if not thousands of illegal aliens from Central America during 26 years in the U.S. Border Patrol. From their point of view the thousands of illegals caught and released into the United States in the past two years with "permisos" issued by the United States Government confirms their perception that violating American Immigration Laws is both acceptable and encouraged. To reverse this perception and stop the mass invasion of America, unmistakable, clear and convincing visual proof that it is not acceptable or encouraged by the United States to violate America's Immigration Laws must happen swiftly. Serious consequences must be applied to "all" Illegal Aliens entering or found in the United States.

The sequence of the solution looks like this: Apprehend, detain, Immigration Hearing within 72 hours, expedited removal ordered, detain, MRE's, U.S. Air Force C-130, "all" illegal aliens repatriated to their home countries. This is the only solution that will work.

Two things must happen.

First, each and every illegal alien entering the United States that is not a native and citizen of Canada or Mexico that requests an Immigration hearing must receive a hearing within 72 hours and an expedited removal ordered issued while the alien is detained in custody.

Second, they must be immediately returned to their home country and when they see their fellow countrymen disembark from the depths of a U.S. Air Force C-130 at airports in their home country and see thousands of the fellow countrymen repatriated by the same method played on radio and television in their home country over and over again they and the world will understand that what President Obama said is no longer true and violation of America's Immigration Laws will not be tolerated. This is because even at their level of perception they know that the President of the United States is the Commander and Chief of the U.S. Military and only the President of the United States could effect such action. Only this action will counter his previous invitations and encouragement for them to come here illegally.

Is this difficult? No, it can be done with the stroke a pen and a telephone. It is in the American Spirit to view the difficult as doable and believe that the impossible just takes a little longer. In this case the little longer is a maximum of three weeks from July 4, 2014, when the first thousand of these Central American Illegal Aliens are repatriated by the U.S. Military on airfields in their home countries.

It will only happen if all Americans thoroughly convince our current elected officials that we will see all of them at the ballot box in November with their retirement in mind if they fail. All Americans dedicated to preserve America and our way of life must join with like minded people throughout America to convince President Obama to act in the best interests of America because we already know who his friends are that support Amnesty, unbridled illegal immigration and open borders:

<http://politichicks.tv/column/breaking-murrieta-ca-pro-amnesty-protesters-linked-revolutionary-communist-party-usa/>

<http://21stcenturywire.com/2014/07/05/washingtons-pr-nightmare-continues-in-murrieta-as-residents-turn-back-the-dhs-buses-again/>

The next step after militarily returning all of these Central Americans to their home countries is simple and easily understood. We at NAFBPO through our unique expertise with immigration have produced a practical, logical and permanent solution to our nation's disorganized and malfunctioning immigration policies. It is fairly short, 20 pages in large print, and is a concise set of proposals. It is titled "Comprehensive Immigration Enforcement and Reform". We call it CIER for a shortened term. Everyone in America is invited and urged to read the CIER at www.nafbpo.org.

Best of all, we believe that implementation of the CIER is the way forward and will prevent a recurrence of these dangerous situations in years to come. Never forget that it is the ability of the illegal alien to come here, receive benefits and remain that must be denied and their removal must come swiftly after their apprehension. Sanctuary Cities must be abolished nationwide and the elements of the CIER must be in place in all 50 states before efforts to physically secure America's borders will be successful.
